CLAIMS

1.   A two-way warp knitted fabric which is formed by plaited knitting a polytrimethylene terephthalate yarn in the front and an elastic yarn in the back and which has a knitted fabric density ratio from 1.55 to 2.35 calculated from the following formula:

knitted fabric density ratio = [(number of courses)/2.54 cm]/[(number of wales)/2.54 cm]

2.   The two-way warp knitted fabric according to claim 1, wherein the elastic yarn in the back forms a knit loop.

3.   The two-way warp knitted fabric according to claim 1, wherein the warp knitted texture is a half tricot stitch.
